## About This Game

Tiles is a fast-paced action puzzle game that will both convolute your mind and burn your finger tips!

It's simple, get from the green tile to the red whilst clearing the blue tiles in between. Consider your moves carefully though as you might regret them later. Oh, and do it fast because the very ground beneath you is falling!

You can also build your own challenges using the fully featured level editor. Every level created for the game was in fact created with the in game editor.

---

## SHARE

This is where things get really fun, you can publish your creations and share them with the world! Every player created level has the ability for players to upvote, favorite, and rate the difficulty of the level.

## FEATURES

- 90 increasingly difficult built-in levels
- Fully featured level editor
- Player created levels world
- Full gamepad support
- Local multiplayer
- Original music

A very interesting and esoteric little puzzle game, Starry Midnight offers you a massive toolbox and goals to work with and offers you no guidance on how to get there - it's up to you, as the player, to figure out how the tools you've been provided with interact in order to manipulate what you've been given to get what you need.

You don't HAVE to play the game this way, of course - there's a lovely guide on Steam offering you charts of the processes involved in making any given thing, but there's still joy to be found in the actual process of creating what you need, even if you know how to make it. Think of it as being the difference between cooking with or without a cookbook.

On the writing side, Carpe Fulgur are at their absolute best again - fantastic scriptwriting combined with the game's innate beautiful aesthetic really help the characters and world come to life. The game is let down by some hamhanded and poor writing in the overarching story aspect - especially with the game's endings - but this is very much an unavoidable problem with the original script rather than any fault in localization.

Honestly speaking, though, the overarching story is such a small part of the game compared to the character writing and development that it doesn't hold the game back much at all (and, indeed, I think my bewildered reactions to the game's attempt at 'twists' provided me much enjoyment in their own right.) There's a lot to love about Starry Midnight, and I think it makes a good rainy day game.. Worth it on a sale, but I'm hard-pressed to recommend this otherwise. It does a really good job of tickling that nostalgia bone for old school adventure gamers, but it does quite a number of things terribly. Tedious walking, a ton of unnecessary detail that just takes up time and adds little to either the atmosphere or the story, and a protag that likes to hear himself talk without actually saying anything of substance. There's also nothing impressive about the writing itself. The characters are bland, the dialogue could be much better, and the story's lackluster. The voice acting's kind of decent, especially for an indie production, but it's hard to ignore some very spotty moments, like that Chinese "cab driver", etc., that I could have done without.. if i save my game it keep on crashing. Abysmal! Don't even buy it at a discount.

Bad character design, ridiculous puzzles, cringeworthy story, cheesy voice-acting. Devs should pay YOU for playing this abomination.. Was really looking forward to trying this game. However, it seems I too am a victim of UPlay and their invalid account problem. Opened a ticket, and as of yet, have not received a response other than the automated "we received your ticket" email. When I get to actually play with the product I paid for, I'll leave a review. For now, not recommending this game because I'm not allowed to play a game that I paid money for.

---

Nothing like coming home after a day spent in meetings looking at graphs and charts, putting your feet up and... playing a game about graphs and charts. Seriously though, this is a unique platformer with some interesting mechanics and cool minimalist visual style.. A bit expensive but SO worth it! This soundtrack is absolutely phenomenal. One of my all time favorite game soundtracks. 10/10. Aero's Quest is one of those games that you need to get into it to totally appreciate it.

In the very first beginning I was skeptical and I was thinking for the worse.

Then, after the tutorial, the game hooked me and I found it very entertaining.

The graphics are simple but not outdated with some nice touch here and there.

The sound is beautiful, I'm a musician myself and I love all the tracks of the game

Mechanics are simple but are working well and generally the game, despite the challenge, hooks you up.

. Even at version 0.404 this game is worth the \$10. Development could completely stop and you would still have a pretty good Hord mode. I rarely purchase Early Access games due to how many times I've been burned, but in this case you get a decently fleshed out game, with good graphics, and fun gameplay right off the bat.

As for the game, it's an interesting hybrid of Horde mode, survival horror, and strategy. You fight waves of zombies, and between every wave you have a chance to upgrade your character, buy ammo, weapons, or upgrade said weapons. You can also place traps and turrets to help take out the zombies. All of which cost money you make by completing waves. The first few waves are all about making enough money to reload your gun. As you progress you make more money, and are able to expand arsenal. All of these features are already in game, and they've yet to even release Version 1.0. This is how Early Access should be done.. Great game! Graphics are cute and colorful and the music is charming; controls take a bit of getting used to but gets easier as you go on. You can really feel all of the heart and soul put into the game! Very fun and very addicting.. Recieved this game from boyfriend since I liked the original.

Play for a few minutes before telling him: "F\*\*KING CHRIST, YOU BOUGHT ME FLAPPY BIRD WITH PUGS"  
continue playing.

10/10. Cute, and very good 18+ content. =3
